DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,111,849 or US 6,242,157.

The references each disclose an optical recording medium comprising a phase change recording layer comprising Sb, Te and Tb. It is recognized that the references do not disclose the crystal structure of the recording material. However, as the materials are the same and the recording layers are formed by the same method (sputtering), this property is seen to be inherent. See '849, col. 8 and '157, col. 9, lines 57-62.

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,548,137 or US 6,605,328 or US 6,677,104 or US 6,731,590 or US 6,751,184 or US 6,798,733.

The references each disclose an optical recording medium comprising a phase change recording layer comprising Sb, Te and Tb. It is recognized that the references do not disclose the crystal structure of the recording material. However, as the materials are the same and the recording layers are formed by the same method (sputtering), this property is seen to be inherent. See '137 Abstract, see '328 Example 2, see '104 col. 7, see '590 col. 6, see '184 col. 11, see '733 col. 12, line 48.

Application/Control Number: 10/829,355 Page 3
